✦ INCREDIBLE TREASURES LUXURY STUDIO & PRESS WORKS ✦

EXECUTIVE ADMIN PORTAL & OPERATIONAL ARCHITECTURE

Autonomous D2C & B2B Command Center Specification • Comprehensive Technical Proposal

Client: M/s Incredible Treasures (Bengaluru) | **Prepared For:** Business Leadership | **Date:** November 2026 | **Release:** v2.4 Master

1. Executive Vision: Complete Autonomous Control

This specification establishes the architecture for the dedicated **Incredible Treasures Executive Admin Portal** (/admin). Unlike basic e-commerce setups where store management is blended into the user storefront, Incredible Treasures provides a **completely isolated, high-security industrial command dashboard**. From here, the business owner commands **real-time order fulfillment, festive homepage banner campaigns, automated 31st month-end Chartered Accountant (CA) tax reporting, full catalog CRUD, and live Razorpay payment settlements.**

■ **Independent Owner Security Gate**	**Portal URL:** http://localhost:3000/admin (Completely separate from customer storefront) **Credentials:** Master Email (admin@incredibletreasures.com) & Master Password / PIN (9945) **Security:** Cryptographic JWT session tokens (it_admin_jwt) with 7-day auto-expiry & zero public storefront bleed.

2. Module I: Dynamic Banners & Festive Offers Engine

To maximize revenue during key Indian festive seasons (Diwali, Dussehra, Durga Puja, New Year, and Corporate Gifting periods), the Admin Portal gives the owner a 100% no-code **Marketing & Banner Controller**:

Marketing Feature	Owner Action in Admin Dashboard	Live Customer Experience on Storefront
Homepage Hero Banner	Upload festival creative (e.g., Diwali Gold Foil specials banner), set headline, subtext, and target collection button URL.	Instantly renders in full high-definition across mobile, tablet, and desktop without code changes.
Top Announcement Bar	Toggle marquee ticker: e.g., *'Diwali Dhamaka: Flat 20% Off on 500+ Luxury PVC Visiting Cards | Code: DIWALI20'*	Sticky announcement bar across all pages with 1-click coupon code copy button.
Promotional Coupon Engine	Create discount rules: Percentage (e.g. 25% off) or Flat (Rs. 500 off), set minimum cart value (Rs. 2,500), and expiry timestamp.	Customer applies code at checkout; 18% GST and subtotal auto-recalculate in real time.
Scheduled Auto-Expiry	Set campaign start and cutoff time (e.g., Diwali midnight). Banners and coupons expire automatically without manual intervention.	Eliminates accidental discount leakages after marketing campaigns finish.

3. Module II: Automated Month-End CA Tax & Payment Ledger

Filing GST returns and auditing payment settlements is completely automated on the **31st (or last day) of every month**. The system prepares complete reconciliation files for the business Chartered Accountant (CA) without human data-entry errors.

Audit Component	Automated Data Generated on 31st of Month	Benefit to Business Owner & CA
GSTR-1 Tax Return Table	Auto-compiles all B2B (with buyer 15-digit GSTIN) and B2C transactions for the calendar month in standard government GST format.	CA directly uploads the file to the GST Portal without manual invoice transcription.
State-Wise Tax Segregation	• Karnataka (Intra-state): 9% CGST + 9% SGST split. • Out-of-State (Inter-state): 18% IGST (MH, DL, TN, etc.).	100% compliant with Indian Central & State GST legislation.
HSN Code Compliance	Summarizes volume, piece counts, and turnover under **HSN Code 49090000** (Custom Printed Visiting Cards & Stationery).	Fulfills mandatory HSN table reporting requirements on GST returns.
Razorpay Settlement Audit	Cross-matches gross order totals against Razorpay Payment IDs (pay_...), deducting gateway MDR fees to show exact net bank credits.	Completely resolves discrepancies between bank account statements and website books.
One-Click CA Email Dispatch	On the 31st at 11:59 PM, a password-protected zip with GSTR-1 Excel, Sales Ledger PDF, and Invoices is auto-dispatched to the CA.	Zero delays; prevents late-filing penalty charges and interest.

4. Module III: Product Catalog & Substrate Lifecycle Manager

The business owner has full autonomous CRUD (Create, Read, Update, Delete) capability over the entire product inventory:

Catalog Function	Operational Capability in Admin Portal	Live Impact on Storefront
Add New Products	Enter product title, select category, upload high-res imagery, input HSN Code, base price, and production turnaround days.	New product goes live immediately across the storefront and 3D studio.
Edit / Delete Products	Modify existing descriptions, change specs, or soft-delete discontinued product lines with 1 click.	Discontinued items are gracefully hidden without breaking past customer order history.
Paper Substrates & GSM	Manage paper substrates: 350 GSM Royal Silk Matte, 400-Micron Tear-Resistant Glossy PVC, Velvet Touch, Metallic Brushed Gold, Spot UV.	Customers see updated substrate options and finish swatches in the 3D card customizer.
Volume Tier Pricing Matrix	Set tiered rates: 100 pcs @ Rs. 10.00/pc | 500 pcs @ Rs. 5.00/pc | 1,000 pcs @ Rs. 4.20/pc | 2,500 pcs @ Rs. 3.20/pc.	Cart and checkout automatically compute volume savings badges and tiered wholesale discounts.

5. Module IV: Live Order Fulfillment & Factory Pipeline

A 6-stage industrial workflow tracking every single order from online payment to factory cutting and door delivery:

Stage	Status Key	Factory Action / Customer Alert Trigger
Stage 1	**ORDER_CONFIRMED**	Customer completed payment via Razorpay. Order drops into database with full shipping address and GSTIN.
Stage 2	**PRE_FLIGHT_VERIFIED**	Pre-press technician checks 300 DPI vector artwork, 0.125" bleed margins, and CMYK Fogra39 color compliance. 1-Click WhatsApp digital proof sent to client.
Stage 3	**IN_PRODUCTION**	Plate burning complete. Job actively running on Heidelberg offset press and laser digital lines.
Stage 4	**QUALITY_FINISHING**	Hydraulic corner rounding, gold edge gilding, thermal lamination, and quality assurance inspection.
Stage 5	**DISPATCHED**	Handed over to BlueDart Apex Air / Shiprocket. AWB docket entered; live courier tracking link sent to customer via SMS and WhatsApp.
Stage 6	**DELIVERED**	Delivery confirmed at customer facility. Digital tax invoice archived in company records.

6. Production Launch Roadmap (3-Day Execution Plan)

Day	Milestones & Integration Targets	Deliverables for Business Owner
Day 1	**Live Razorpay & Email OTP Activation** • Switch Razorpay from Sandbox to Client Live Merchant ID & Secret. • Connect Google 16-character App Password for branded email login OTPs.	Real customer transactions with 100% money settlement into Incredible Treasures bank account.
Day 2	**Shiprocket Logistics & Festive Marketing Engine** • Connect Shiprocket API for automated BlueDart/Delhivery AWB labels. • Activate Dynamic Banners & Coupon Code Manager in Admin Portal.	1-click courier docket dispatch and ability to run holiday promotions anytime without developer assistance.
Day 3	**CA Month-End Automation & Official Launch** • Test GSTR-1 automated Excel export and CA email scheduler. • End-to-end real purchase test by staff and official public switch-on.	Fully certified, enterprise-grade D2C & B2B e-commerce platform live on production domain.

✦ ARCHITECTURE APPROVAL & CLIENT SIGN-OFF ✦

This document certifies that the Incredible Treasures Executive Admin Portal fulfills all core operational, financial, and marketing requirements. Upon client sign-off, live integration proceeds according to the 3-day roadmap.
